IN THE NEWS

Paycheck protection for workers should not be redirected to the Hotel owners, operators and investors

Included in the Coronavirus, Aid, Relief, and Economic Security (CARES) Act is a 4454 Billion fund for aid to small businesses that are under distress during this crisis. Many investors and private equity firms that own hotels qualify because they employ less than 500 workers. So while hotels are laying off workers, the private equity firms are able to receive loans and bailouts because there is a lack of transparency in knowing who is applying. **UNITEHERE! President D. Taylor**, wrote to Federal Reserve Chair Jerome Powell, *"While they [Hotels] make their plea in the name of hotel employees, it has become clear to us that major hotel owners and operators have divorced themselves from their workers."* Forbes
